

TILE AND SLATE UNDERLAY

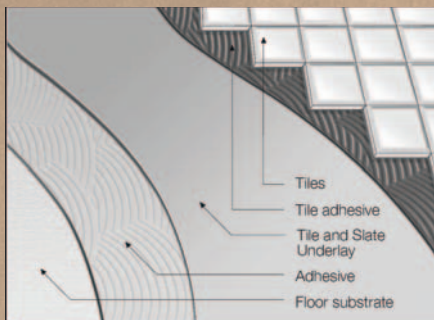

Now available in convenient
1800 x 900mm size

What goes under floors is as important as what goes on top

Tile and Slate Underlay has been designed to protect the finished tile floor from movements that occur naturally in timber, particle board or plywood floors. Minimising movement helps reduce the potential for tile cracking.

This underlay is for use under tiles, heavy grade vinyl and cork in internal flooring applications and is suitable for use over internal timber, particle board or plywood floors in wet and dry areas.

Features and key benefits

- Fibre cement underlay sheet with pre-marked nailing pattern on the face of the sheet for quick and easy installation.
- The smaller sheet size makes Tile and Slate Underlay easy to handle – easy to carry.
- Ideal for smaller tiled areas.
- For wet and dry internal floors.
- Can be easily cut with a score and snap knife.
- Suitable for use with ceramic tiles.
- Larger size sheets are also available from James Hardie for larger tiled areas elsewhere in the home.
- Tile and Slate underlay is non combustible.
- Tile and Slate Underlay is warranted for a period of 15 years.
