

Enduring style the smarter way

Horizon™ Lining is ideal for work or living spaces that require a great-looking and durable wall finish. And because it is made from James Hardie fibre cement, you can be assured of its performance in both wet and dry internal areas.

Durability and colour versatility are not often found together, with one sometimes having to be prioritised over the other. There are no such compromises with Horizon Lining. It allows you to easily create a colourful designer interior that is also durable. Colours and jointers can provide a transition between rooms or can be mixed as a design feature.

Horizon Lining is available in a palette of eight colours, suited to both residential and commercial applications. From the bold orange of Sunset to the muted, neutral Day Break, your colour can be as subtle or as daring as your design requires. Each colour has a matched jointing option or can be jointed using silicone.

Enduring features and key benefits

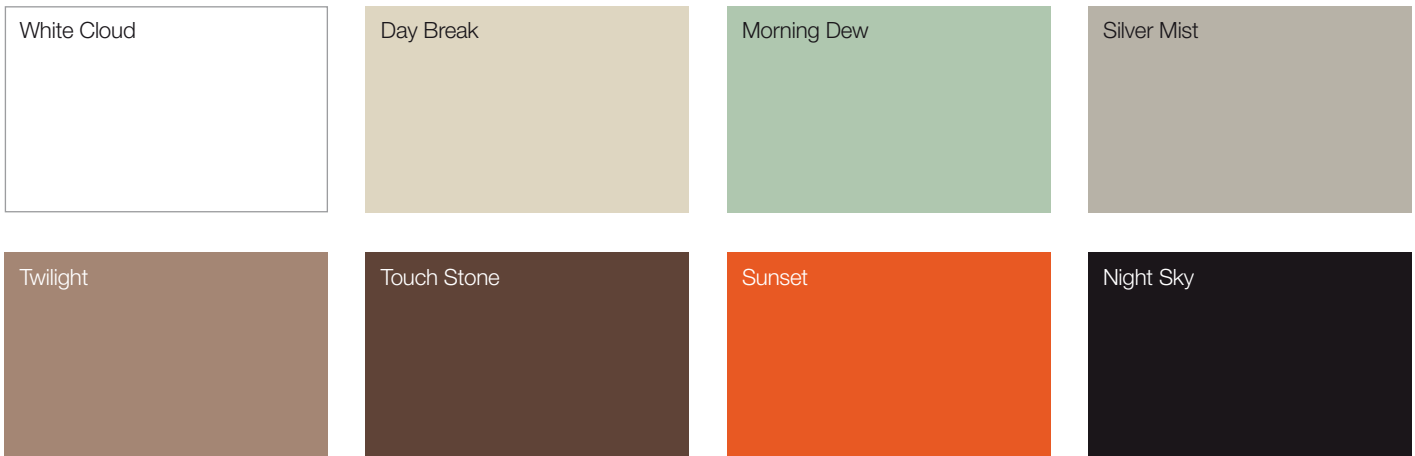

- Prefinished fibre cement sheet offering a durable substrate with an appealing finish
- Suitable for wet and dry internal lining areas
- Easy to install straight onto framing or over existing linings
- Resistant to moisture-induced deterioration and will not support mould growth when installed and maintained correctly
- Horizon Lining is a non combustible wall lining
- Low maintenance and easy to clean
- Simplifies construction by reducing the number of trades used, especially in wet areas (no need for substrate, can be installed directly onto framing)
- Reduces installation time
- Jointing options available to create different looks — choose from aluminium jointers or silicone.
- Horizon Lining is warranted for a period of 15 years.

Specifications

Horizon Lining - Nominal Sheet Sizes

LENGTH (MM)	WIDTH (MM)	THICKNESS (MM)
2400	1200	6
2700	1200	6

Colour Range

Please note that due to variations in the printing process, the printed colours above are indicative only. For a more accurate representation of the colours in the Horizon Lining colour range, please request a product sample on 0800 808 868 or via www.jameshardie.co.nz. Owing to manufacturing tolerances, slight colour variations are also likely to occur between different batches of lining.

Horizon Lining Aluminium Extrusions and Mouldings
