SHEET

HardieFlex

SHEET

HardieFlex

SHEET

A SMOOTH, FLAT PANEL FOR A TIMELESS AESTHETIC

The applications for HardieFlex™ Sheet cover a wide range of design solutions for residential and light commercial buildings. HardieFlex Sheets are suitable for use in extensions, second story additions and gable ends. It can also be used to line porches, verandahs, carports and for soffits and eaves.

Don't overlook the durability and sophistication for new construction as well. It is a natural, unsanded sheet that is immediately suitable for a paint finish and the installation could not be easier.

The panels make straight walls look sleek, clean and modern. Strong enough for commercial use, it provides ultra-protection for your residential investment. For a truly modern look add battens for design impact.

When it comes to external sheeting, you can't beat HardieFlex Sheet for its quality, affordability and 15 year warranty.

What is Fibre Cement?

Engineered for durability, fibre cement is resistant to fire and damage from moisture and rotting, making it the ideal low maintenance alternative to traditional cladding materials. Fibre Cement offers both contemporary and flexible design options and is used by many New Zealanders to create stunning facades.

The simple combination of locally sourced wood cellulose fibre, sand, cement and water, give the product its strength to stand the test of time.

Profiles

FLAT SHEET

The panels make straight walls look sleek, clean and modern. You can also create contrast to your home by combining it with other cladding materials such as Linea Weatherboard.

BOARD AND BATTEN

Add rustic appeal to contemporary buildings by adding battens and create instant design impact to your home.

Sheet SIZES

LENGTH (MM)	WIDTH (MM)	THICKNESS (MM)
1800	1200	6
2400	900	6
2400	1200	6
2700	1200	6
3000	1200	6
2400	1200	7.5
2700	1200	7.5
3000	1200	7.5

Features

& BENEFITS

WEATHER RESISTANT

Engineered to stand up to harsh conditions, including coastal conditions

COST EFFECTIVE

Cost effective and long lasting

RESISTANT TO DAMAGE FROM MOISTURE

Resistant to damage from moisture and rotting

FIRE RESISTANT

Up to 60 minute fire resistance rating (FRR) can be achieved when installed as per the James Hardie Fire and Acoustic Design Manual

BRACING

Suitable for exterior bracing systems

EASY TO CLEAN

Fast and effective using low pressure water and a brush

EASY TO CUT TO SIZE

Can be cut to size easily with the HardieKnife, minimising dust on site

EAVES & SOFFITS

Available in large sheet sizes to accommodate wider soffits.

15 YEAR WARRANTY

15 year product warranty

Eaves

& SOFFITS

HardieFlex Eaves Lining are a versatile, low-cost and durable eaves option. One of its most appealing features is that it comes in larger sheet sizes to accommodate wider soffits. This results in a quicker installation time with less waste. The sheets have an un-sanded finished surface, which is ideal for either semi-gloss acrylic or lightly textured semi-gloss coatings to match your design scheme.

The product is perfect for all eaves, verandahs, porches and carports.

Sheet

SIZES

LENGTH (MM)	WIDTH (MM)	THICKNESS (MM)
1800	1200	4.5
2400	900	4.5
2400	1200	4.5
2700	1200	4.5
3000	1200	4.5

Care

& MAINTENANCE

With minimal maintenance you can keep your home looking like new. The following are the best practices for this product to improve its longevity and performance.

- Washing down your exterior every 6-12 months using low pressure water and a brush, and every 3-4 months in extreme coastal conditions (such as high winds and sea spray)
- Clean out your gutters, downpipes and overflow pipes as required
- Cut back vegetation and landscaping which is too close to or touching the HardieFlex Sheet
- Re-applying exterior protective finishes. Always refer to the paint manufacturer for wash down and re-coating requirements
- Maintaining the exterior envelope and connections including joints, penetrations, flashings and sealants
- The clearances between the bottom edge of the HardieFlex Sheet and the ground must always be maintained
