WEATHERBOARDS

TRADITIONAL AND TIMELESS. SLEEK AND STRONG

James Hardie™ Weatherboards boast such versatility that your home will be a standout on any street. You will enjoy protection from New Zealand's harsh conditions in the home of your dreams that reflects your personal style. They can be painted in a large variety of colours and are available in three textures making it the ideal cost effective bevel-back weatherboard.

James Hardie Weatherboards are for use as an external cladding in residential single and medium-density homes, including alterations and additions, where a cost-effective traditional or contemporary weatherboard look is required.

Smooth Weatherboard

What is Fibre Cement?

Engineered for durability, fibre cement is resistant to fire and damage from moisture and rotting, making it the ideal low maintenance alternative to traditional weatherboards. Fibre cement offers both contemporary and flexible design options and is used by many New Zealanders to create stunning facades.

The simple combination of locally sourced wood cellulose fibre, sand, cement and water, give the product its strength to stand the test of time.

Smooth Weatherboard

Profiles

SMOOTH WEATHERBOARD

You can't go wrong with this simple, clean look. Smooth Weatherboards give you the classic traditional horizontal lines and will also suit a modern build.

LENGTH (MM)	WIDTH (MM)	THICKNESS (MM)
4200	180	7.5
4200	240	7.5
4200	305	7.5

RUSTICATED WEATHERBOARD

Our Rusticated Weatherboard gives the look of a textured weatherboard with a strong timber grain, bringing a sophisticated appearance to your home.

LENGTH (MM)	WIDTH (MM)	THICKNESS (MM)
4200	205	7.5

FRONTIER WEATHERBOARD

The Frontier Weatherboard mimics the look of a traditional wood grain for a more distinguished feel.

LENGTH (MM)	WIDTH (MM)	THICKNESS (MM)
4200	245	7.5
4200	310	7.5

Rusticated Weatherboard

Cost effective and long lasting

EASY TO CLEAN

Fast and effective using low pressure water and a brush

MADE IN NEW ZEALAND

RESISTANT TO DAMAGE FROM MOISTURE

Resistant to damage from moisture and rotting

LOW MAINTENANCE

15 YEAR WARRANTY

Backed with a 15 year product warranty

Corner options

CORNER SOAKER

Use a corner soaker to achieve a modern, angular, sleek corner to your design. Corner soakers come ready to paint and are available in aluminium. Add further definition to your design by contrasting the colour selected against your cladding to create a statement look.

SLIMLINE BOX CORNER

The slimline box corner is achieved using an aluminium box corner mould. The slimmer, flush finish gives you the traditional box corner design with a modern twist. They come ready to paint and can be painted any colour you choose.

AXENT TRIM

Axent Trim made from premium fibre cement, is an easy way to create the classic feature corners often seen on traditional New Zealand homes.

The 16mm thickness of Axent Trim helps create the impression of solidness, and its crisp, clean edges highlight frames and openings. Axent Trim can be painted dark as well as light colours.

It's the ideal edge treatment for around windows, finishing touches to cladded internal and external corners as well as a design enhancer for butt joints.

Care

& MAINTENANCE

With minimal maintenance you can keep your home looking like new. The following are the best practices for this product to improve its longevity and performance.

- Washing down your exterior every 6-12 months using low pressure water and a brush, and every 3-4 months in extreme coastal conditions (such as high winds and sea spray)
- Clean out your gutters, downpipes and overflow pipes as required
- Cut back vegetation and landscaping which is too close to or touching the James Hardie Weatherboards
- Re-applying exterior protective finishes. Always refer to the paint manufacturer for re-coating requirements
- Maintaining the exterior envelope and connections including joints, penetrations, flashings and sealants
- The clearances between the bottom edge of the James Hardie Weatherboards and the ground must always be maintained
