WEATHERBOARD

Linea

WEATHERBOARD

The background of the advertisement is a dark, textured surface, likely the Linea Weatherboard product, with a blurred image of a tropical flower in the bottom right corner. The word "Linea" is written in a white, elegant cursive font, centered in the upper half of the page.

Linea

WEATHERBOARD

FROM CLASSIC COTTAGES TO MODERN MASTERPIECES

Made to withstand our harsh and unpredictable climate, Linea™ Weatherboard is both tough and beautiful. The superior durability, low maintenance and design flexibility set this product apart from its weatherboard alternatives.

From villas to baches, New Zealander's love affair with weatherboard can be seen in many of our historic building designs. An obvious choice for restoring older buildings, the clean horizontal lines of Linea Weatherboard also work beautifully with the expansive surfaces and spaces of contemporary architecture.

Linea Weatherboard can be used to create colourful feature walls, full cladding for new builds and cladding for additions and renovations.

With Linea Weatherboard your home can have all the distinctive features and charm of weatherboard with all the benefits of low-maintenance, premium fibre cement. The boards are pre-primed to hold paint longer and you can take your pick of exterior finishes, including modern dark paint colours. With minimal maintenance such as periodic wash downs, you can keep your home looking great for many years to come.

What is Fibre Cement?

Engineered for durability, fibre cement is resistant to fire and damage from moisture and rotting, making it the ideal low maintenance alternative to traditional weatherboards. Fibre cement offers both contemporary and flexible design options and is used by many New Zealanders to create stunning facades.

The simple combination of wood cellulose fibre, sand, cement and water, give the product its strength to stand the test of time.

Linea™ Weatherboard and Stria™ Cladding

Profiles

135MM WIDE

Capture the look of the iconic Kiwi villa with a narrow board that provides the fine detail required for this classic look.

150MM WIDE

Ideal for smaller homes, this width ensures you get the accentuated design shadows you're after with the space.

180MM WIDE

Larger walls suit the larger board size, giving you stylish, deep shadow lines and impressive external feature walls.

LENGTH (MM)	WIDTH (MM)	THICKNESS (MM)
4200	135	16
4200	150	16
4200	180	16

Linea Weatherboard is a bevel backed weatherboard with tongue and groove edges at the ends for jointing and is available in three different profiles.

Features & BENEFITS

WEATHER RESISTANT
Engineered to stand up to New Zealand's harsh conditions

EASY TO PAINT
Can be painted any colour, even the darker shades

COMPLIANCE
BRANZ appraised and CodeMark certified

RESISTANT TO DAMAGE FROM MOISTURE
Resistant to damage from moisture and rotting

LIGHT WEIGHT
Classified as a lightweight cladding under NZ Building Code

COST EFFECTIVE
Cost effective and long-lasting

FIRE RESISTANT
Fire protection with up to 90 minute fire resistance when used as part of a fire rated system

EASY TO CLEAN
Fast and effective using low pressure water and a brush

25 YEAR WARRANTY
Backed with a 25 year product warranty

Corner

OPTIONS

CORNER SOAKER

Use a corner soaker to achieve a modern, angular, sleek corner to your design. Aluminium corner soakers come ready to paint or you can add further definition to your design with stainless steel and copper corner soakers. These can be left unpainted creating contrast against your cladding to create a truly unique look.

SLIMLINE BOX CORNER

The slimline box corner is achieved using an aluminium box corner profile. The slimmer profile gives you the traditional box corner design with a modern twist. They come ready to paint and can be painted any colour you choose.

AXENT TRIM

Axent™ Trim made from premium fibre cement, is an easy way to create the classic feature corners often seen on traditional New Zealand homes.

The 16mm thickness of Axent Trim helps create the impression of solidness, and its crisp, clean edges highlight frames and openings. With performance benefits that match your cladding, Axent Trim is resistant to fire, damage from moisture and rotting, and can be painted any colour you choose.

Care

& MAINTENANCE

With minimal maintenance you can keep your home looking like new. The following are the best practices for this product to improve its longevity and performance.

- Washing down your exterior every 6-12 months using low pressure water and a brush, and every 3-4 months in extreme coastal conditions (such as high winds and sea spray)
- Clean out your gutters, downpipes and overflow pipes as required
- Cut back vegetation and landscaping which is too close to or touching the Linea Weatherboard
- Re-applying exterior protective finishes. Always refer to the paint manufacturer for re-coating requirements
- Maintaining the exterior envelope and connections including joints, penetrations, flashings and sealants
- The clearances between the bottom edge of the Linea Weatherboard and the ground must always be maintained
- Stainless steel soakers used in extreme coastal conditions or in a sea spray zone may show some signs of 'tea staining'. It is an aesthetic issue and to minimise staining the soaker must be washed/polished frequently
