
Axon™ Panel

Axon™ Panel

BRING DRAMA AND DETAIL TO YOUR WALLS WITH VERTICAL LINES

Creating a strong visual impact for your home is easier than ever with Axon™ Panel. Easy to install, robust and versatile, Axon™ Panel is a clever alternative to traditional vertical shiplap weatherboards. The vertical lines complement classic and modern building designs to create stand out facades, and bring texture and interest to outdoor rooms.

Use Axon™ Panel to wrap an entire house for a beachy feel or mix it up with other wall materials and colours to get a distinctive, modern look. It's made from fibre cement and can be painted a range of colours, including darker more contemporary shades.

If you're looking for something rustic, some added warmth, or a unique contrast, Axon™ Panel is also available in a grained finish. For a true timber finish Axon™ Panel can be stained in a colour of your choice.

Axon™ Panel can be used in residential or commercial applications wherever a modern design is required, including full cladding for new builds, and cladding for additions and renovations.

Designed to fit common wall frame sizes, Axon™ Panel also makes perfect sense as an aesthetic and water resistant alternative to plasterboard in internal spaces such as laundries, bathrooms and high traffic areas.

What is fibre cement?

Engineered for durability, fibre cement is resistant to fire, rot resistant and resistant to moisture damage, making it an ideal low maintenance building material. Fibre cement offers both contemporary and flexible design options and is used by many New Zealanders to create stunning facades.

The simple combination of wood cellulose fibre, sand, cement and water, give the product its strength to stand the test of time.

Profiles & Sizes

133mm GRAINED

Axon™ Panel's grainy, wood-like texture contrasts well with a smooth flooring surface and can help bring a softer touch to your modern outdoor space.

*Only available in 3000mm x 1200mm x 9mm

133mm SMOOTH

The vertical lines of Axon™ Panel combined with its smooth finish help create a clean and distinctive design look. Available in three sizes.

400mm SMOOTH

Got a bigger area to clad? With its subtle joins, this larger format panel is perfect for larger walls and surfaces, creating an almost geometric feel to your exterior. Available in three sizes.

LENGTH (mm)	WIDTH (mm)	THICKNESS (mm)
2450	1200	9
2750	1200	9
3000	1200	9

Features & Benefits

WEATHER RESISTANT

Can be painted a wide variety of colours, including the darker shades

EASY TO INSTALL

Easy installation makes Axon™ Panel a fast and effective way to cover your home's exterior

15 YEAR WARRANTY

Backed with a 15 year product warranty

Care & Maintenance

With minimal maintenance you can keep your home looking like new. The following are the best practices for this product to improve its longevity and performance.

- Washing down your exterior every 6-12 months using low pressure water and a brush, and every 3-4 months in extreme coastal conditions (such as high winds and sea spray)
- Clean out your gutters, downpipes and overflow pipes as required
- Cut back vegetation and landscaping which is too close to or touching the Axon™ Panel
- Re-applying exterior protective finishes. Always refer to the paint manufacturer for re-coating requirements
- Maintaining the exterior envelope and connections including joints, penetrations, flashings and sealants
- The clearances between the bottom edge of the Axon™ Panel and the ground must always be maintained
